Surface Preparation:

New Substrates:
- Substrate must be free from any form of contaminants.
- Apply 1 – 2 coats of MAS Masonry AR Primer and MAS Masonry Primer White into the substrate.
- Application of MAS PVA Wall filler to smoothen the surface. Application of 1 – 2 coats of MASCRYL # 1000 or Mastic Royal for final top coating.

Old Concrete (previously painted)
- Remove all blistered, cracked and peeled off paint from the surface.
- Penetrated paint must be cleared and treated with 3% ammonia and water.
- Glossy finish coat must be sanded.
- Apply 1 coat of masonry primer prior to application of PVA WALL FILLER with a rate of 0.5 – 1.0 kg/m² depending on the porosity of the surface.

Method of Application:

Method of Application: - Putty Knife
